NOTES OF THE WEEK

Dodd's Street Sprinklers will make their appearance and do full duty on our streets this

There will be a meeting of the Young Men's Christian Association at the Lyceum on Thursday Le We are requested to state that the Royal

The P. M. S. S. City of New York, on route from the Australian Colonies for San Francisco, will be due at this port on Monday next, the lat

The steamer Likelike made a splendid trip to the other Islands and back, last week. She brought back a large amount of freight and a goodly number of passengers of all classes.

Let We notice that the new steamer James Makee is having a next awaing deck placed on her by Mesers Tribeta & Secusion, which when com-pleted, will add greatly to the comfort and conve-nience of her passengers. The American topsall schooner Enstace,

leptain Bole, arrived off the barbor from Kahului, on Sunday evening, 24th test,, and came to anchor. Six left for San Francisco, on Monday afternoonlast in ballast, there being no cargo for her at this 1 On Saturday last the steamer Lebua made an execusion trip to Walaius, Oahu, returning the same

evening. Quite a number of our citizens including their Majesties, the King and Queen, and H. R. H. Ruth Keelikolani, rubbased this favorable apprortanity of spending the day at sea and cojoying a signit of the beautiful scenery of the Waianac mountains and Waianac Bay. We call attention to the card of James Monsarrat, Esq., Attorney and Counsellor at Law, who

has just been admitted to practice in the Courts of this Kingdom. Mr. M. is a son of Hawsii, and a graduate of Harvard Law School, and therefore pos-senses parallar advantages for the practice of his profession in this Kingdom, in which we wish him The excursionists who, under the care of His

Excellency the Minister of the Interior, made the tour of the Islands last week, returned on Sunday morning is good health and well pleased with the trip, which was a delightful one. The programme previously laid out was carried out to the letter without a single incident happening to mar the arrangements, and thus the distinguished strangers were treated to an excarsion which will be long remembered by them, as well as the exhibition of a genuine Hawaiian bospitality, which gave nost to the occasion and illustrated in a degree at least, the practical workings of reciprocity between Hawaii and the great republic of the United States.

The weather during the past week has been but a continuation of that which we have previously had for months. In a word it has been more propitions than for many years during the summer months. At this season of the year, in this latitude, rain is not expected, but this latter blessing has been bountituily bestowed and the results are everywhere visible, is rich and luxuriant vegetation to every department of husbandry. The rains have been so diffused and general that no part of the group has been lacking an abundance, which will swell the products to unusual proportions and bring rich returns to our people for which all should be exceeding thankful to the great dispenser of "every good and perfect gift."

THE CHINESE THEATER. - This building is about completed. It seems to be of but a temporary character, and so it would seem, if report be true, that the structure is but for six months. If we are correctly informed it is the intention to import a full professional theatrical company from China, consisting of apwards of 60 members, who are to be under engagement for six months. At the end of the engagement it is the intention to take down and remove the building by the company here, who are at the head of the enterprise, and convert it into some other use. It may be that the intention is to convert the theater into a less house. Or this convert the theater into a joss house. On this point we are not informed, therefore it is a mere

Fort Street Church was occupied on Sunday isst by a large congregation, morning and evening. for the first time for many weeks. The enlarge ment of the edifice by the recent improvements has tended to make the church much more comfortsfor an increase of at least three hundred more worshippers. We learn that the new sittings are being taken with experience, and that all the space being taken with experience, and that all the space will soon be occupied, which we sincerely hope may prove true, because such a result will not only prove the wisdom of the colargement, but the fact that it was a necessity which the community required. Such facts prove a healthful tone of reli-gious public sentiment in Honolulu, which is encouraging and cannot but bring forth good fruits in the near future, "a consummation devoutly to be wished."

HACK FARES .- At the last session of the Legislative Assembly of this Kingdom a law was passed on the subject of back fares, &c., and the Minister of the Interior issued his rules and regulations thereon, in which, among other things, the rates of fare to be charged were fixed as well as the distances to be traveled. In order to make assurance doubly sure that backmen would comply with the rules and regulations of the Interior Department, tickets were issued to make it practicable for people to make change, and prevent the backmen from evading the regulations. This was all well enough evading the reruintions. This was all well enough for a few months, but now there is no more attention paid to the law or rules of the department than if there was neither law or rule on the subject. The old charges are made, and such a thing as a ticket is not to be seen. We do not know exactly who is in the fault in this instance. Certainly it is not the Interior Department, because that department has done its full duty in the premises. We rather lucline to the opinion that the tailt lies with the people themselves who suffer the imposition, and if they will be taken in and done for, it is none of our business we suppose.

Activity Along the State of the shipping. Everywhere we went we found the people actively engaged loading and unloading vessels of all classes, from the large elipper ship to the smallest coaster. This speaks well for the business outlook, and shows that there is a healthy state of trade with the Islands, and that although some people complain of hard times and scarcity of ney, there is a large amount of trade and commoney, there is a large amount of trade and com-merce carried on from day to day, and that times on the whole are much better here, comparatively speaking, than in many other localities of greater pretensions than Honolall. When we hear of the depression of trade and commerce at such a port as San Francisco, as we do by every arrival from the Chast, we may well draw the comparison between that great city and our little Island Kingdom, and not with no amall pride the difference in the note with no small pride the difference in our fa-

DIED IN THE HOSPITAL .- The native men Ainui. who died in the Queen's Hospital on Sunday the 16th inst., it will be remembered, was under arrest for manalaughter, for causing the death of the Chinaman Lam Yong, on the 2d inst., with his back through careless driving, and who at the same time sustained severe lujuries by the accident which cost him his life." Ainut, at the time of the accident had his leg crushed, and in that condition was kept without medical aid for some days, and would not have been discovered had it not been for the perseverance of the Deputy Marshal, who after ascertaining his whereabouts had the injured man taken to the hospital for medical treatment. Had Aloui's friends had his leg properly cared for at once after the accident, his life no doubt would have been saved. Thus two men lost their lives by the carelesaness of a driver of a public back, who was under the influence of liquor at the time of the accident. Indeed, if Aloui had been sober on the 26 inst., the accident would not have happened. After careful investigation of this case, we have the most ample testimony that Aloui, the driver, was not only noder the influence of liquor but was actually drunk at the time. Whoever farmished the unfortunate mative with the liquor to make him drunk, can reflect upon the enormity of the crime of violating the law by furnishing natives with liquor to make him drunk. Somebody will have a fearful responsibility to meet in this instance, and we leave them to their reflections. not have been discovered had it not been for the

VITAL STATISTICS .- We have beard it suggested that it would be highly proper, if the Board of Health would order the weekly publication of the births and deaths. So far as the births are concerned that seems to be pretty well attended to by which the wire spet with lightning-like and the victim, hot was a few foot of the victim, hot was a few foot of the victim, hot was a few foot of the victim, hot was a real as are, and with one blow sewered the wire, hot with one blow sewered the wire. The left arm was severed to assert that there are fewer offspring among the human species in these Islands in proportion, than it may be seen that the victim. The left arm was severed to the same size, the body of the victim. The left arm was severed to the least the shoulder, the right between the slow and species. His bownless was all the body together. His bownless was all the body toget the happy parents. The truth is that a birth in

disappeared. Some persons object to such a weekly publication of the deaths on the ground that it will trighten timid people. This is no good reason. The community have a right to know the sanitary condition of their sarroundings, and to keep them in ignorance of existing malarial or contagious diseases is a crime. We hope the Board of Health will consider this matter at once and order such a publication as suggested for the information of the people. The truth cannot do any harm in any case.

NEW IMPROVEMENTS .- We notice that Mr. D. W. Clark, jeweler, is putting up a handsome finish to the front of his new building on Merchant street. The front is surmounted with ornamental wood work, which will give to the building an lmposing appearance. We also notice that in the center of this wood work there is a large space, which we understand Mr. Clark intends to fill with a splendid imitation chronometer clock of the most approved workmanship, by which the public can with the utmost certainty set their time pieces twice is each twenty-lour hours, as the hands of this new clock will be right to the minute at those periods. This will no doubt be a great convenience to that class of individuals whose time-pieces used setting as often as twice in twenty-loar hours. It will also be a convenience to another class of individuals—we mean those who, from stress of weather, have neglected to set their watches before going to their twenty-loar. have neglected to set their watches before going to sleep, or who may be physically incapellated from performing the delicate operation of winding the critter up before retiring. We like the public spirit of Mr. Clark in this instance, and no doubt others will appreciate it as highly as we do. There is nothing like improvements, and Mr. Clark seems to cater to the public taste. In some cities and large towns like itomodulu, the public spirit of the people would manifest itself by contributing to such a matter of public convenience as a lown clock, but here we have a generous gentleman among us of so large heart as to take upon himself the cutire expense of this public convenience. Vive la Clark.

A GOOD TIME COMING .- We look upon the advent of the Madetra islanders, by the British ship Ravenserag, as the beginning of the good time coming for these Islands. Already we see that among the new arrivals are men with well-filled purses. One man was pointed out to us on Monday morning last with a wife and six hale, hearty children, who has in solid cash the sum of \$7,000, wherewith to purchase a home and with which he, with his thrifty wife and family, can begin tife in a comparative state of independence. Another man, with a wife and family, was pointed out to us who has a capital of \$4,000 in each. These instances we refer to, to show that there is a field in Madeirs, which if cultivated judiciously, will not only bring us hardy, industrious, law abiding people, but hundreds of industrious, law abiding people, but hundreds of thousands of capital, all of which may be made available for the common benefit of these Islands and their people. It therefore becomes a question of political economy which the authorities ought to consider with grave care, as to what is the best means of securing as large a number of the people from Madeira as can be induced to migrate and become permanent settlers here. There should be no squamishouse on this subject, but the utmost exertions should be put forth to "make hay while the sun shines." Suplineness now, in a matter of so much importance to the future well-being of this kingdom, would argue not only a want of proper forethought on the part of the officers of the Government, but an indifference to the discharge of an important duty, which we are gird to note is not the case with the present head of the laterior Department, whose action in this matter has been energetic and statesman-like. energetic and statesman-like.

We take pleasure in announcing that the old and reliable New York Life Insurance Company has established an agency in this city, and has appointed the well known house of H. Hackfeld & Co., as General Agents, and Mr. C. O. Berger, as Special Agent. The New York Life is one of the staunchest institutions of the present day, and deserves the confidence and patronage of our citizens. The assets (which are all cash) are over thirty-eight million dollars, and the yearly locome eight millions, while the actual cash surplus is over seven million dollars. This company certainly has everything in its lavor to be successful here, for three principle reasons, viz: 1st. The standing of the company. 2d. The able and efficient men as Agents for these Islands. 3d. The new and approved Tontine plan of Iusurance, which combines the following advan-

1. It has received the unqualified approval of the abiest consulting Actuaries of the United States, including Mr. Shepard Housaus, until recently the distinguished Actuary of the Mutual Life of New York, and Mr. Edwin W. Bryant.

2. It is a form of policy which effectually answers all objections offered to Life Insurance.

3. It divides the profits of insurance equitably between those who die early and those who live long.

foug.

4. It gives the assured the option at stated periods of withdrawing his entire Equity, £ e.—the accumulations upon his policy, and which it is estimated will exceed the smount of premiums paid; and taking into account the cost of his insurance, give 5. It practically offers an Endowment Policy at a ife Rate.
6. It sllows, if preferred, at stated periods, a paid

6. It slidws, if preferred, at stated periods, a paid up policy of nearly double the amount that can be secured in any other way.

7. It preferred, it places one in the annual receipt of by far the largest cash annuity, upon any given sum, that was ever paid to an annuitant.

In conclusion we commend this Company, and its Investment Toutine Policy, especially to Capitalists, investors of Funds, and Business Men generally, giving the preference to the Fifteen and Twenty Fear Toutine Periods. By it, the risk of death is effectually provided for; while to those who survive, and continue the payment of premiums, it must yield profile for mexcess of those realized from the investment of equal amounts in atized from the investment of equal amounts in Savings Banks, or Corporate Stocks offering equal security.
